

## Project Design Phase

### Proposed Solution Template

|               |                                                                 |
|---------------|-----------------------------------------------------------------|
| Date          | 15 February 2025                                                |
| Team ID       | LTVIP2026TMIDS65624                                             |
| Project Name  | prosperity prognosticator: machine learning for startup success |
| Maximum Marks | 2 Marks                                                         |

### Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

| S.No. | Parameter                                | Description                                                                |
|-------|------------------------------------------|----------------------------------------------------------------------------|
| 1.    | Problem Statement (Problem to be solved) | To find the prediction whether startup is success or failure               |
| 2.    | Idea / Solution description              | Actually it measure the real scalability of work                           |
| 3.    | Novelty / Uniqueness                     | It will be suited for different learning machines                          |
| 4.    | Social Impact / Customer Satisfaction    | It will benefit to ai ml projects and students                             |
| 5.    | Business Model (Revenue Model)           | It will allow as a business purpose , it is very useful for more companies |
| 6.    | Scalability of the Solution              | More realiable and good idea for solving solution before implementing      |
